Project Overview

Building Materials Investment Corporation owns and operates the GAF Materials Facility, an asphalt roofing production facility, permitted under NSR Permit No. 7711A.

On December 10, 2009, Standard Permit No. 91414 authorized the installation of two baghouses to control the particulate emissions from the Line 3 filler transfer operations at the GAF Materials Facility.

Building Materials Investment Corporation seeks to renew Registration No. 91414 via renewal certification with this action.

Building Materials Investment Corporation has certified that there have been no changes associated with the PCP registration and that they continue to meet all requirements of the Standard Permit.

The initial PCP Standard Permit was authorized under the 6001 Rule – 30 Texas Administrative Code § 116.617 PRE-2011-FEB-09 and is being renewed under the 6001 non-Rule PCP Standard Permit (effective date February 9, 2011).
